

REMARKS

The Examiner's Action mailed on January 25, 2005 has been received and its contents carefully considered.

In this Amendment, Applicants have editorially amended the specification and claims 1, 20 and 21. Claims 10-19 and 27-36 have been cancelled as directed to a non-elected invention.

Claims 1 and 20 are the independent claims. Claims 1-9 and 20-26 are now pending in the application. For at least the following reasons, it is submitted that this application is in condition for allowance.

Applicants note with appreciation that the Examiner has indicated that claims 1-9 and 20-26 are allowed.

The Examiner has objected to the drawings because they fail to show signs/numbers as described in the specification. It is noted that amendments to the specification have been made to correspond with the drawings (FIG. 1, FIG. 2A, and FIG. 2G-2H) of the present invention. Thus, the drawings correctly show signs/numerals as described in the specification now without further correction. Accordingly, it is submitted that the objection should be withdrawn.

Claims 1 and 20 have been objected to because of the informalities noted by the Examiner. In response thereto, claim 1 has been amended from "the first polysilicon layer and the second polysilicon layer" to the requested -"the N-type heavily doped (+) polysilicon layer and the P-type lightly doped (P-) polysilicon layer"-. Moreover, amendments to claims 20 and 21 have been made to correct the inadvertent informalities noted by the Examiner, as well as other informalities noted during their review. Thus, the objection should be withdrawn.

Based on the above, it is submitted that the application is in condition for allowance and such a Notice, with allowed claims 1-9 and 20-26 earnestly is solicited.

AMENDMENT

(10/728,767)

Should the Examiner feel that a conference would help to expedite the prosecution of the application, the Examiner is hereby invited to contact the undersigned counsel to arrange for such an interview.

Respectfully submitted,

April 25, 2005
